accessories	Panel Dock for Garmin aera 5xx series	34-00-00-S-35695	The Panel Dock is designed to fit the Garmin aera 5xx handheld GPS series. The GPS is held firmly in place, but can be easily removed by pulling the release tab, located on the left side of the unit. The Panel Dock is designed to fit in a standard 6.25 inches avionics stack, but it can also be flush-mounted anywhere else in the panel. The antenna and power cables slide through prefabricated keyholes in the back of the unit, which keeps the connectors from slipping back into the panel when the unit is removed. Specifications: Width: 6.25 inches Height: 4.25 inches Depth: 1.53 inches Weight: 3.3 ounces Material: durable, high quality plastic Note: The panel dock comes without GPS unit! S.EL267
accessories	Panel Dock for Garmin aera 795	34-00-00-S-35254	The panel dock for the Garmin aera 795/796 follows the tradition of other products by holding the GPS securely in the panel while allowing the GPS to be easily removed from the plane for flight planning or for use in a different plane. The aera 795/796 is a big step up in capability from its predecessor, the GPSMAP 695/696, but it is also a bit larger. This meant that we had to take extra care to minimize the footprint that it will occupy in your panel. By sculpting the top and bottom of the Panel Dock, we are able to keep the overall dimensions to 6.25 inches wide by 8 inches tall. If you already have a 695/696 panel dock installed you will be pleased to know that the new 795/796 panel dock is designed to fit in the same opening. The screw holes are in the same location as well. So you should be able to easily upgrade. The panel dock contains an actuator button for accessing the on/off switch that is located on top of the device. This allows you to turn the GPS on or off, or set the brightness, without removing the GPS from the Panel. As with the 695/696 panel dock, a cooling port on the back of the 795/796 panel dock is included. This port is compatible with standard avionics cooling fans if you decide you want to use this feature. S.EL262
